

New office in Copenhagen:

Bridging Central Europe and Scandinavia

(Left and right pictures: our shared offices at Reulf Ramstad Arkitekter AS, ©B+G)

At Bollinger+Grohmann (B+G), our success thrives on expertise, creativity, and close collaboration, all infused with a genuine enjoyment of project work. Building upon these pillars, we are thrilled to announce the opening of our new office in Denmark!

The Copenhagen office will reinforce our established relationships with Danish stakeholders, fostering closer cooperation and streamlining future opportunities in structural and façade engineering at the service of architecture.

We see Copenhagen as an international hub for sustainable building design that aligns with B+G's international philosophy. Combined with our commitment to integrating structural engineering and analysing environmental effects, we aim to reduce environmental impacts through a creative and sensible approach to projects.

Location: Gammel Kongevej 131B / 1850 Frederiksberg
(Metropolitan Copenhagen)

Copenhagen has captivated B+G for years, marked by successful collaborations with renowned firms. We eagerly anticipate further fruitful partnerships in the years ahead. Denmark will be a hub for our work in Scandinavia, hand in hand with our Oslo office.

Our commitment to inter-office collaboration remains steadfast as employees will continue to traverse between branches, enriching B+G's collective expertise. With a focus on complex construction projects, this knowledge exchange is integral to our long-term growth.

With the inauguration of B+G Copenhagen, our international family, comprising over 400 professionals across 20 branches, stands ready to tackle your construction challenges. We invite you to engage with us as we craft tailored, innovative, cost-effective solutions for your projects through collaborative planning.
